IT/DATABASE ADMINISTRATION, SOFTWARE DEVELOPMENT, AND COMPUTER FORENSICS

Extensive experience and practical training in **SQL SERVER 05-19, ORACLE 10g, MYSQL Database, SSIS Business Intelligence (BI), T-SQL, SSRS, Power BI, Micro Strategy, SAS**, **DEVOPS**, COMPUTER FORENSIC SCIENCE , HACKING, and **Software development and design using asp.net C#, VB, HTML, CSS, JSON, with excellent knowledge of documentation**, relevant principles and technology. I have undergone extensive training in Computer Forensics, investigating hard drives, PDAs, cell phones, networks, and hacking activities. I am knowledgeable of a vast array of IT software/programs and proficient at creating, managing, implementing, analyzing, backing-up and recovering SQL server 05, 08, 12, 14, 16, 17, 19, oracle 10g and MS Access database. I am also knowledgeable in data modeling and design and have profound understanding of relational database and management systems. Beyond my technical expertise, I have a uniquely well-rounded skill set and diverse educational background. I have a Master's degree in Business Administration focused in Technology Management, and I have a Bachelor's degree in information technology focused in Computer Forensics. I am a great team player and effective team leader. I have excellent analytical and problem-solving abilities, diligent attention to detail, and great written and oral communication skills. I am seeking an opportunity where I can bring improvement as well as pursue and develop my skills in a dynamic and challenging environment.

Additional core competencies include:

✓ Database Development & Management	✓ SSRS, Power BI, ETL/ SSIS, SAS, DEVOPS
✓ Backup and Restore both SQL Database and Oracle	✓ Fluent in English, Haitian and French.
✓ Computer Forensics certified	✓ Quality Customer Service
✓ Triggers and functions	✓ Excellent Communication Skills
✓ Programming in asp.net C#, VB, HTML, CSS, T-SQL	✓ Good understanding of replication and High Availability
✓ Experience in Oracle 10g platforms	✓ Views and procedures
✓ Experience in SAS platforms (PROC SQL)	✓ Experience with Power BI (Desktop Author)

EDUCATION & CREDENTIALS

Master of Business Administration –University of Phoenix   Jan 2015
Focused: Technology Management GPA: 3.47
I have obtained great knowledge and understanding of leadership, business and team management, which prepared me to lead any team.

Bachelor of Information Technology – American InterContinental University, Weston, Florida   Mar 2012
Focused: Computer Forensics Investigation GPA: 3.04

Certifications

CCFE / Certified Computer Forensics Examiner
Trained and obtained a Certificate in Excel 2010

IT/COMPUTER EXPERTISE

Operating Systems: Windows 7,8,10, Windows server 2003, 2008, 2012, 2019 and Mac OS 8.6.9.2.
IT Software: MS SQL server 2008, R2, 2012, 2014, 2016, 2017, 2019, Oracle 10g platforms, visual studio (SSIS, SSRS), strong T-SQL programming knowledge, visual studio / ASP.NET (C#, VB) , TCP/IP, HTML, CSS, JSON, DEVOPS, MS Access, FTK, EnCase, Helix, Paraben, X-ways Forensics, Win-Hex, Pro-Discover, PC Inspector File Recovery, VMware, Email Examiner, Microsoft Office 2000, 2003, 2007, 2010 (Word, Excel, PowerPoint, Access and Outlook)

PROFESSIONAL EXPERIENCE

Centene Corporation / Wellcare – Tampa, FL   March 2023 - Present
Lead. Business Technical Analyst / Developer
This role includes but not limited to manage team access to information, create Processes using SSIS and console app to extract, transform and load data, create SSRS and Power BI reports, create .net C# application to allow end users to manage team-based data. - Compliance with HIPPA

Centene Corporation / Sunshine Health Plan – Sunrise, FL   February 2016- May 2019
Data Analyst II / Developer
*This role includes but not limited to **create Processes using SSIS to extract, transform and load data, create SSRS and Micro strategy reports with graphs**, perform batch load to update large volume of information about providers, members, and practitioners at once in Oracle relational database, create .net **C#** application to allow end users to quickly search and update specific records. Program .net **C#** Console application to download data automatically from third party website and load into database for analysis and report. Lastly documenting all processes to ensure an easier modification.*

Collaborate with the team to manage projects from start to finish or manage my own assigned projects.

Communicate project requirements and progress across departments involved and stakeholders. Schedule and plan weekly or bi-weekly meetings to ensure the projects are being worked on and provide help and suggestion where necessary.

- Create tables, Store Procedures, Views and Functions
- Create SSIS packages and SSRS reports
- Develop application in ASP.net c#, packaging application for installation.
- Use T-SQL and excel to analyze data, fix errors, add business rules necessary and reload data using batch load process
- Compliance with HIPPA

Robert Half Technology - Miami, FL   August 2015 - February 2016
For Woolton which is now (RetailApp)
Database Administrator-consultant
- Analyzing Data and create process to solve problems

- Trouble shooting queries and improving performance
- Setting up and Checking database jobs daily
- Reviewing reports to identify error and miss information
- Microsoft SQL Server 2014 platforms in Azure
- Microsoft SQL Server and Windows account management
- Database Software Installation and Configuration
- Perform maintenance/ set up full daily, Differential and Transactional backups, rebuild and reorganize indexes
- Setting environment structure and plan disaster recovery model
- Create new store procedures, trigger and functions using T-SQL
- Create documentation to show each process activities

Amerilife Group LLC – Clear Water, FL   February 2015- August 2015
Business Intelligence Developer (BI)
- Create databases, tables, stored procedures, functions, views and indexes
- Create SSRS reports
- Create SSIS Packages (ETL)
- Create business Templates to meet each carrier's needs

Pasco Sheriff - Land O' Lake, Florida   February 2013 - 2015
Database Administrator (DBA)
- Microsoft SQL Server 2005, 2008, 2008 R2, 2012 and Oracle 10g platforms
- Perform High Availability
- Microsoft Windows and SQL Server clustering / mirroring
- Microsoft Windows and SQL Server Log shipping / Replication
- Microsoft SQL Server and Windows account management
- Database Software Installation and Configuration
- Perform maintenance/ set up full daily, Differential and Transactional backups, rebuild and reorganize indexes
- Recover databases
- Analyze performance and speed of database's tables
- Optimizing queries
- Perform security to prevent unauthorized access of specific data by creating roles and groups
- Create SSRS, Cognos and Crystal Reports
- Create SSIS Packages, ETL
- Create Application in asp.net such as windows form and web form using C#
- Most of all ensure to create details documentation that are easy to follow for other developers.

RELEVANT TRAINING

Training

SQL Server 2008 and 2008R2 Database Implementation and maintenance - Quickcert.com   March 2012 -August

- ➢ Implementation and maintenance
- ➢ Database Software Installation and Configuration
- ➢ Created database using MS SQL Server 2008 and R2
- ➢ Installed and configured SQL instances
- ➢ Performed database analysis, data mining and created data warehouse
- ➢ Backed up, Restore and performed tuning in MS SQL server
- ➢ Query database using T-SQL
- ➢ Created views and procedures
- ➢ Created triggers and functions
- ➢ Created crystal report using Visual Studio
- ➢ Created SSRS in Visual Studio and SQL report builder
- ➢ Created database and Report in MS Access
- ➢ High Availability (mirror, replication and log shipping)
